Notice to Users of Power Macintosh 7200, 7500, 8500, and 9500 Computers

Make sure that you use version 1.1.1 or later of your Chinese Language Kit with your Power Macintosh 7200, 7500, 8500, or 9500 computer. To install the Chinese Language Kit version 1.1.1, first install the WorldScript Updater 1.0. Then install version 1.1 of your Chinese Language Kit. Finally, install the Chinese Language Kit Updater to update your software to version 1.1.1.

The WorldScript Updater 1.0 is available in the Apple Extras folder on Power Macintosh 7200, 7500, and 8500 computers, and on Power Macintosh 9500 computers available after October 1995.

If your Power Macintosh 7200 model does not contain the WorldScript Updater folder, you can get the updater in the eWorld Computer Center:

Apple Customer Center
   Apple Technical Support
      USA Apple Software Updates
         Macintosh
            System Software
               Other System…

It's available via the Internet at ftp.support.apple.com/pub/ Apple SW Updates/US/Macintosh/System Software/Other System…

You can also contact your Apple Authorized Dealer for assistance.
